Professional Summary

I am a self-taught, highly motivated web developer with a passion for creating impactful, user-friendly web applications. With a solid foundation in both front-end and back-end technologies, I strive to build scalable and interactive solutions. My experience spans from developing responsive user interfaces with React.js to designing robust back-end systems with Node.js. I am always eager to learn new skills, collaborate with diverse teams, and contribute to the creation of innovative digital products.

Skills

Frontend: HTML, CSS, JavaScript, React.js, TailwindCSS
Backend: Node.js, Express.js
Database: MongoDB, MySQL
Version Control: Git

Projects

Online Voting System

- Users can sign up/sign in using a unique ID and password, and vote for candidates.
- Voting results are displayed live, showing the candidate with the highest votes first.
- Admin manages the candidate list but cannot vote, and Users can vote for only one candidate.

Technologies: React.js, Node.js, Express.js, MongoDB

Online Clothing Store

- Product filtering, browsing, and cart management.
- Admin panel for inventory and product control.

Technologies: React.js, Node.js, TailwindCSS, Express.js, MongoDB

Employee Management System Frontend

- Admin creates employee IDs, assigns tasks, and manages departments.
- Employees can submit tasks and request leave.
- Includes intuitive dashboards and responsive design for seamless use.

Technologies: React.js, Node.js, TailwindCSS, Express.js, MySQL

Millennium Photo Framing Services

- Showcases a variety of photo frame designs for users to explore and select from.
- Features a responsive interface for seamless viewing across devices.
- Integrates WhatsApp for direct communication and order placement.

Technologies: React.js, Firebase
